

31st March 2020

To Whom It May Concern:

Declaration of Conformity with RoHS3 and REACH Directives

This document declares that the products which we at Hawke International manufacture are fully compliant with REACH, (Registration, Authorisation and Restriction of Chemicals, European Union Regulation (EC) 1907/2006) and RoHS (Restriction of Hazardous Substances-EU Directive, 2011/65/EC-RoHS2 & 2015/863 RoHS3).

Hawke are compliant with the requirements of the REACH Directive. As a downstream user we have contacted all our suppliers and asked them to confirm that they comply with the directive and for them to identify any product which contains SVHCs according to the Candidate list and its revisions, published by ECHA (European Chemical Agency).

To date we have not received any notification that material used to manufacture Hawke product is a SVHC. We therefore confirm that Hawke International product does not contain any of the REACH Substances of Very High Concern (SVHC), as specified in the ECHA (European Chemical Agency) Candidate list.

Although cable gland products manufactured and supplied by Hawke International are not classified as electrical and electronic equipment under the terms of the RoHS3 directive and the directive does not therefore apply to any of these products supplied by Hawke International.

However, we can confirm that Hawke cable glands are in conformity with Directive 2015/863/EU of the European Parliament of the use of certain hazardous substances in electrical and electronic equipment.

Note article 4 paragraph 6 applies for brass content as detailed in Annex III 6(c).

I trust this information will be of assistance to you.

Best Regards,

A. Reid
Engineering Manager

Connection Solutions
for Global Applications
